Hello,

i created GDI_MiniGunner_3Boss.

When i was on Nod they dont shot me.. what must i do?

JFW is your Friend

Hint: JFW_Base_Defence

It has something to do with the way your objects file is set up I think. I'm sure Yrr or someone on the BI team will correct me.

When I create them on my server they work just fine. (With no scripts.)

I think Roshambo is right, have you checked out your innate behaviour settings?

i created this bot via c++

like:

```
if (Type == 0 || Type == 1) {
if (wcsicmp(Msg2, L"!bothavoc") == 0) {
if (Commands->Get_Money(Get_GameObj(ID)) >= 2000) {
    GameObject *obj = Get_GameObj(ID);
    Vector3 position = Commands->Get_Position(obj);
    position.Z += 5;
    position.X -= 5;
    Commands->Create_Object("CnC_GDI_MiniGunner_3Boss_Skirmish",position);
    Commands->Give_Money(Get_GameObj(ID),(float)-2000,false);
    char Message[100];
    sprintf(Message,"page %d [PB] %s your item created.", ID, Get_Player_Name_By_ID(ID));
    Console_Input(Message);
}
```

```
else {
  Commands->Give_Money(Get_GameObj(ID),0,false);
  char Message[100];
  sprintf(Message,"ppage %d [PB] Sorry, this item cost $2000", ID,
  Get_Player_Name_By_ID(ID));
  Console_Input(Message);

}
}
}
```

If the preset you're creating has a innate behaviour that stops it from attacking, then it doesn't really matter about your code.
Look at the preset in level edit.

Probably wrong arguments.

Okay in order to get a normal bot to work on a map, you have to run pathfind on the map by placing a pathfind generator on the map first then running pathfind. Also temp the GDI_MiniGunner_3Boss preset and call it BOT1 then click on settings and scroll down and make sure that the check box "UseInnateBehavior" is selected. (Just like the picture above)
