I'm sorry I guess I did leave that part out... how dumb of me...

At that point it repeats itself saying exactly what you see there. So it all loads and appears to be fine but then for no apparent reason it shuts down and redoes that.

its a FDS glitch, it means a corrupt install, only way I know of fixing this is to uninstall the FDS, delete the entire westwood registry (or only the RenegadeFDS if you have ren installed), and start from scratch.

Thanks a bunch, I'll try this and see what happens.

Also, check to make sure the nickname is not in use. If the nickname is already logged into XWIS it restarts continuously.
