This is wat happens when i try to connect my FDS using the !start command. Note that this is cloudyserv. I really have no idea why it keeps failing plz help me

<@AoW-bot> Initializing Westwood Online Mode

<@AoW-bot> Detecting bandwidth...

<@AoW-bot> Failed to log in, retrying

<@AoW-bot> Logging on....

1. Does it start up fine the way you would normally would?

2. Make sure the serial is a valid serial and the hostname is different then the one you would normally use.
