NOTE: I did search and try things listed in other topics first (Checking login/pass, using valid serial, etc.)

While trying to make my FDS connect to WOL I get the following:

[16:45:55] *** Auto starting game. Type 'quit' to abort ***

[16:45:55] Initializing Westwood Online Mode

[16:45:56] Got server list

[16:45:57] Got server pings

[16:45:57] Logging onto USA Server

[16:45:58] Logged on OK

[16:45:58] Applying server settings

[16:45:58] Creating game channel...

[16:45:58] Failed to create channel

[16:46:03] Retrying channel create

At which point it starts repeating itself. Is there anything I can try (other than the things listed at the start of post) to do to fix this?

You need a valid serial, username and password. Check here for more info on the serials.

I do have all of those, and I used the serial from my game, but it still seems to be having problems. Could a firewall cause this?
