Anyone has the textures for the orca lift truck below???? They were in one of the commandpacks, but isnt available for download anymore.

And i would be interessted to know its "history"...

I guess, it was originally created by westwood, but they dont use the model later. they made the ssm-launcher from it.

And the model was later used by the commandmod?
So Genocide fixed or made it?

Because I found the statement from CommandoSR here in the forum:

Aircraftkiller: "Where is the orca lift Truck?"

CommandoSR: "Frankly said, the model got slapped and was turned in to SSM Launcher."

http://www.renegadeforums.com/index.php?t=msg&goto=92123&rid=22815&srch=orca+lift#msg_92123

Herewith files:

- gmax without textures
- Original westwood conceptarts of the orcalift
- picture from a topic about the commandmod-assets

An orca lifter is basically a mobile helipad which can repair refuel and re-arm. The concept has been skipped out of renegade and also out tiberian dawn. As seen on the tiberian dawn one it might have been an armored orca transport.

It would be cool if you could make it drivable and then make the lift work aswell. In addition, it would be cool if you could make some scripts attached to it to make it like a re-arm station and all that. Like a Orca with limited ammo and it goes to the lift turck for refuel and all that. There are some JFW scripts for that kinda use I think, like JFW_Aircraft_Fuel and JFW_Aircraft_Truck.

[View Forum Message](#) <> [Reply to Message](#)

i would like to bone it, yes. but i dont have any textures and may be only incomplete gmaxfiles.

MSwindows wrote on Tue, 22 April 2008 14:35So you did not check it before you posted it?

sure i checked. strange question.

but may be an the packages, which are not available for download anymore, are OTHER files.
may be, the files i have are only steps at work.

[View Forum Message](#) <> [Reply to Message](#)

But don't you have the files .gamx files already attached to you first post? NVM I too confused, well I think it would be pretty cool to get it to work from how I described above. Actually I think someone already had the textures and models already done in the topic "Pre-release shit topic" from the mod forum.

The ocra lifter can simply be fixed the only problem is finding the textures

rrutk wrote on Tue, 22 April 2008 19:47i would like to bone it, yes. but i dont have any textures and may be only incomplete gmaxfiles.

The texture used on the truck in that picture is very similar to the SSM's texture.

Canadacdn wrote on Tue, 22 April 2008 15:04rrutk wrote on Tue, 22 April 2008 19:47i would like to bone it, yes. but i dont have any textures and may be only incomplete gmaxfiles.

So, if the SSM is built from this older vehicle, the texture for the SSM might work on it. The texture used on the truck in that picture is very similar to the SSM's texture.

i doubt the orca lifter textures are 512 X 512 or something around thT

i'm a little bit confused too today. i got an ugly cold and feel ill

the gmaxfile orcalift.gmax seems to be ok.

dont now , what the additional parts on top in v_orcat2.gmax are.

Subject: Re: OrcaLift
Posted by [Gen_Blacky](#) on Tue, 22 Apr 2008 21:36:14 GMT
[View Forum Message](#) <> [Reply to Message](#)

v_orcat2.gmax hatchery is all messed up but in orcalift.gmax the parts are grouped and locked

Look closely at the lighting, that picture was taken on the beta engine.

Originally Blue wrote on Wed, 30 April 2008 16:55Man! Someone really needs to find out how to implement that back ingame.

Find the textures!

I guess, some of the guys her ein forum have them, because they were released here some years ago.

See, most people that release shit in this forum keep it to themselves and don't let it go.

If they "released" it, it wouldn't be to themselves. Posting pictures is different than releasing it.

Regardless, rrutk seems intent on releasing stuff, so I don't think that's a problem.

i just got unbanned from these forums lol

so one thing before you guys start doing useless stuff.

the renegade engine does not handle this properly, a orca on this vehicle would just A: not look

good
B: would not work
C: if it would work it would suck
d: its useless anyways

well, would be great, if one could decide for themselves, what is useless or not.

Too bad you didn't stay banned.

Also, I'm sure there's a way. And it wouldn't be useless if you set up the truck to repair and re-arm (If you have limited ammo on aircraft) orcas and other aircraft maybe.

Couldn't you somehow attach the orca to the lift by say press the firing button on the lift and the orca sticks to it and is not let go until the button is pressed again or the secondary button is pressed? < That would be awesome in my opinion that way it would be useful, you could attach the orca get in the orcalift vehicle and then drive it somewhere and let go and get in the orca, would be useful I think like that if it is possible it probly isn't though.

[View Forum Message](#) <> [Reply to Message](#)

You can do anything if you got the skills for it.

You can setup aircraft with limited ammo and fuel if you want, there is a few maps out there that are like that and when you run out of fuel, which is based on a timer script, you crash.

You could attach a script to the vehicle that would reset the timer and rearm the Orca with ammo.

I don't know how mobile scripts/zones work but I guess there is a way as if you look at the mobile

gap vehicle in the APB and the Radio Jammer.
