Old Sakura and Old Havoc (Logan) are in always.dat complete.

which more are there?

Found these textures. First three (c_nod_mg_arm/body/head.tga) seems to be the old version of the nod minigunner? But where are his w3d-files?

The other two files may be parts of an old nod minigunner-officer (c_nod_mgo_arm/head.tga) ?

Because both characters have another complete texturemap.

They don't have their own w3d. They use the current .w3d for the nod minigunner. They are just not combined together, you would have to do that and rename it to the current skin. also please don't start another thread with this crap. We already have one going already, only one is enough.

They already made Always.dat thread
