Well, you all know the fog, you can set up start and end distance
now, why can't I change the color?

Color depends on the stage's natural sky color and whatnot. If it's around sundown or something,
it'll be more orange-ish or yellow-ish. Mess around with day/night settings, cloud settings, and etc,
and you'll get different fog colors.

4 AM's blueish fog is a favorite of mine.

I am sure ambient light settings change the colour of the fog.

Darkness of the clouds will make the fog darker or lighter as well.
