I have a secret version of roleplay2. PM me is you want it. There are new weapons, defences, and
BOATS

Wait, am I supposed to care?

Whatever you've got sucks compared to the real version. Be patient and wait for the real thing, it's
coming soon.

View Forum Message <> Reply to Message

Yea its cool that you have a secret version, but the map updates so often i would bet its missing all the new stuff, and we do already have a hovercraft, as well as a dingy which is currently being put in. Although i wouldnt mind seeing your version, maybe there is some cars or boats we can steal oO.

View Forum Message <> Reply to Message

Well, that is true. But you guys wont release it. The one i have is better than the one that is in the public so it would be enjoyable for some time!

Subject: Re: Roleplay2 Updates

View Forum Message <> Reply to Message

The one that is public is almost if not more than a year old

But uh, thanks for proving my hypothesis that the only thing you've changed is the way you type. You're still an immature little child.

And by the way, my laptop could probably run it, seeing as how it can run all the internal tests perfectly.

View Forum Message <> Reply to Message

Can you even mod, or code, or even model?
Well i can, and you propably cant. So you are stupid near me.
Are you jelous the way i type now? I started typing like this like 6 mouths ago.

View Forum Message <> Reply to Message

Hey its not a competition whos penis is larger, so keep your "i am better" comments away from this thread lol. Upload your version and let people decide if they like it how about that.

The map runs very well now with even the lower end pcs, as alot has been optimized, alot of interiors are moved, and alot has been fixed since the last public release.

View Forum Message <> Reply to Message

That's why you're still banned from EKTRPG, HORQWER. And your version is probably cocks compared to the other one. Just because you can suck missilexx's cock for a really old internal version doesn't mean you have a better version.

You can go ahead and release it, it doesn't even matter- The new version will kick its ass by far.

As for the updates on the site, cool. Glad you finally are updating the site again.

View Forum Message <> Reply to Message

Ok, you guys are saying that to your mod. Ok. You guys made it not me. And if the one that you guys are currently making, why cant you just release it? And every one knows that i'm horqwer, so dont try to call me horqwer for a reason.

Subject: Re: Roleplay2 Updates
Posted by GEORGE ZIMMER on Sun, 18 May 2008 03:13:50 GMT

Actually I didn't make it, all I do is provide a few ideas and test shit. And play it, and etc. I don't make it.

Also, it's not being released because of the fact that there's still some bugs and scripting that need to be put in. Just finalizing stuff.

Now tell me, what oh-so-famous mods have you made with a fairly large userbase, quite a few dedicated players, a whole server dedicated soley to playing it, along with a coder and a few helpers to make it even MORE awesome, and claiming the title of the biggest Renegade map in existance?

That you made all your own or with your own mod team, that is. So no, ripping rp2 and editing the objects.ddb slightly does not make you a person working on rp2.

Subject: Re: Roleplay2 Updates
Posted by HeavyX101- Left on Sun, 18 May 2008 03:35:34 GMT

I didnt edit the Roleplay2 objects.ddb, i just downloaded it, but it is not the one that has been released in april 2007. One of your testers gave me the map.
And i'm currently making working on 3 mods.
You want to see my model, i know they are not super good but 12 yearls old cant even make that: NO PICS
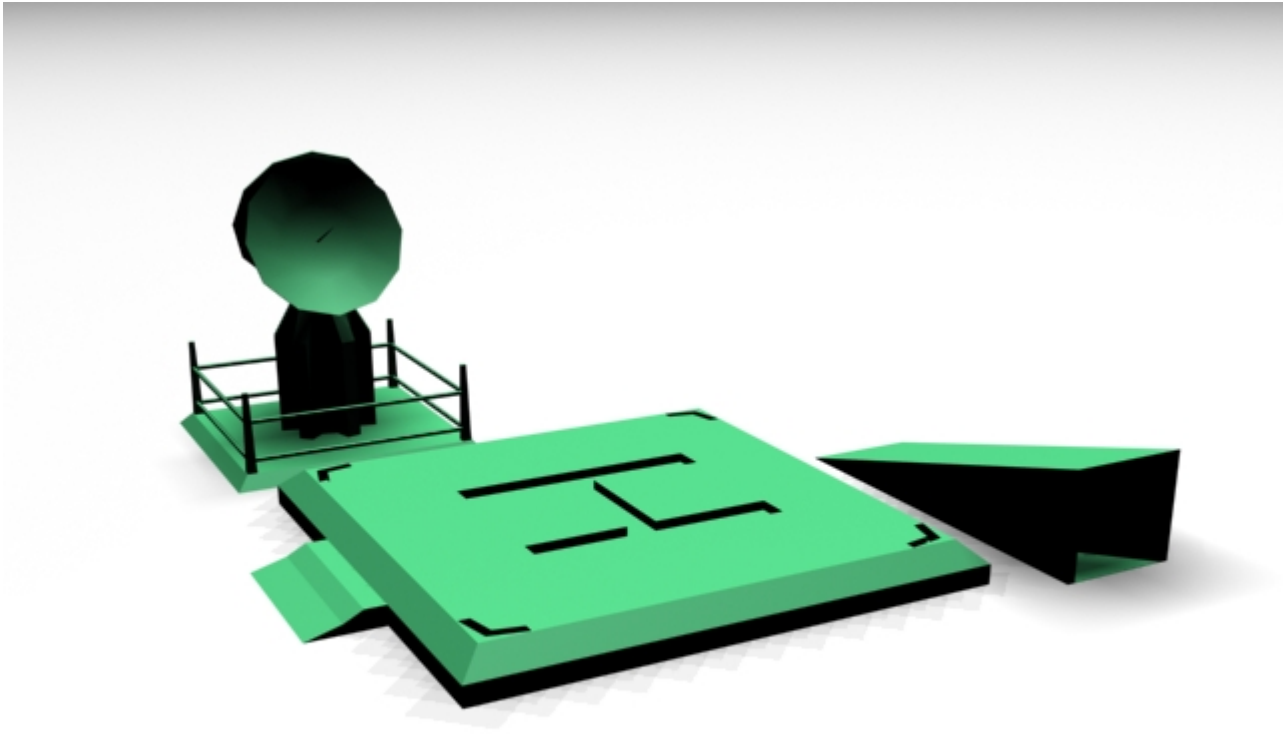

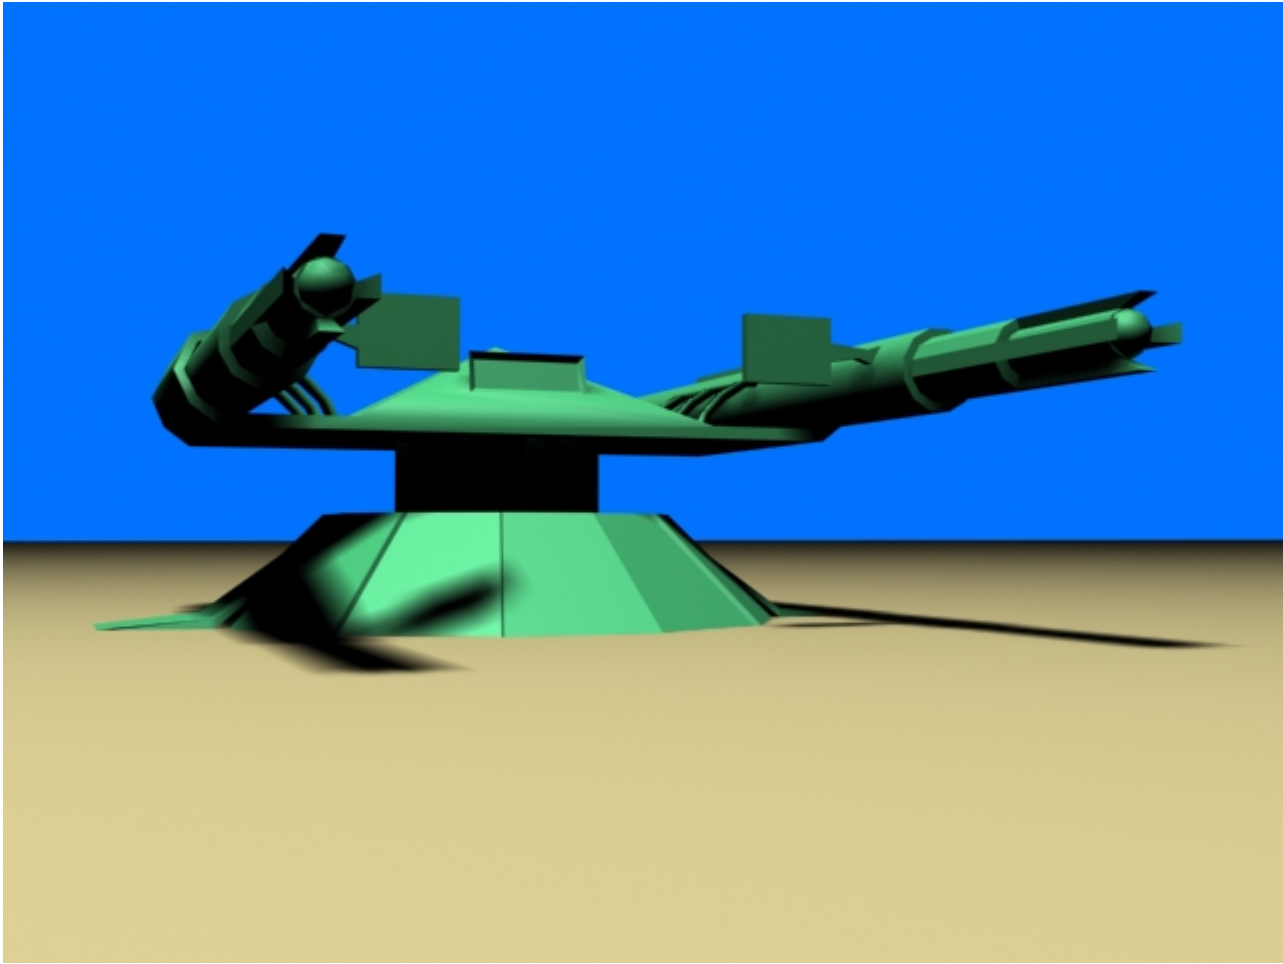

Sorry that it took lots of space.

First, you were advertising a "Secret" version of the mod you claimed to have when you probably have nothing, or some really old internal test.

Second, you have asked me before over MSN frequently if I needed any help on RP2.

Can we please stop flaming and just get back on topic!

HORQWER, please stop infuriating other members of these forums by bragging. You have been not allowed into the RP2 team so please stop trying.

Cabal8616, please stop flaming him on no grounds of what he may actually release.

Until he does release his mod that you claim is a rip-off, there's no use in condemning him for stealing RP2 until you have proof. He may not even publish the mod at all, or it may have no RP2 material in his final release.

I meant to say it in a good way. The one i have is the test one that i got from one of your testers and it is better than the one that is in public so i wanted people to play it a little bit until the BOMB version comes out. Right now the public one is kinda boring for some people because they played it for a year.

Why cant Blazea show of infact this thread was made for rp2! I wonder would they post rp2 models hmmz let me think this is a though one.

ofcourse they will.

Btw what do you win or do you hope to win with showing of your models here?
(these models you post dont even fit the rp2 content)

Go and make your own thread.

ps: gj on rp2!

Hey your RP2 looks like something on a tight budget at some piss-poor film festival. You should work on a directors cut or something.
