Look Renegade can have Reflective Textures!

Standard Medium Tank (Normal)

Mammoth Tank (Reflective)

That adds more Realistic Effect!!!

IronWarrior wrote on Thu, 22 May 2008 13:51Looks like shaders.dll to me.

Although with jonwil gone, mine are still messed up.

Okay, I'll humor you. Are these "truly" reflective or do they just look the part? Move the tank around and give us shots of those different angles.

Having support for per pixel specular lighting does not mean that reflective surfaces are supported. They aren't. This looks like the stock 3.4 era shader applied with a few new normal maps (evidenced by the single light source). Although, it is rather nice to have somebody finally reading the manual and doing nice things using shaders.dll

"reflects" you need to make new .dds files, edit shader.sdb

Yeah, make the normal maps and then edit shaders.sdb to add them in (I should know, I wrote the
code). So you didn't do any changes to the .fx file or the ProgrammableShaderClass, right?

<http://ati.amd.com/developer/sdk/radeonsdk/html/tools/toolsplugins.html>

Give it a greyscale texture, and it will spit out a normal map. Black is low, white is high.

Yes but when i convert back tga to dds, (tga already got that blue-white negative color) and try to test it ingame, i see same weird color and no reflection or anything (my tank screenshot). But np, im sure noone not gonna share that feature anyway.I just noticed Nopol's effect, nothing more...

DL link for the normal maps [UPDATED]:

<http://www.mediafire.com/?eynivmbgggm>

Put the .mix file and the shaders.sdb into the data folder.

The Nod APC and the Nod Harvester's normal maps are screwed up because they share the same material names as their GDI counterparts...

Enjoy!

[EDIT]Updated link contains both the .sdb and the new normalmap.mix with the missing normal textures.

Subject: Re: Look!

The quickkey you provided for file download was invalid. This is usually caused because the file is no longer stored on Mediafire. This occurs when the file is removed by the originating user or Mediafire.

It works. Canadacdn informed me that I forgot to include 3 normal map textures inside the mix, so I'll get that up ASAP-It's up.

[EDIT] Check above for updated link that fixes some stuff.
