Ok, let's try it this way.

There is a lime green GDI skin pack somewhere on the internet (I can't seem to find it again either).

Inside that skin pack the file I am looking lies.

So if you have seen this pack plz link me to it.

This package has a lime green hummer (with rims I think) in it that matches the barracks outside.

I remember the picture oreview of the package shows the hummer.

Nevermind I stumbled upon it in another skin pack I found.

The file name is ref_corg.dds.

Still I think a list of all the .w3d/.dds files and what they are for would be very useful to some people.
