How do you launch multiple instances of renegade?

Sorry if this is in the wrong section.

Right click over the game desktop icon and choose props, in the link for the game.exe add to the end of it +multi

So it should be something like this: "C:\Hello\Westwood\Renegade\game2.exe" +multi

You need to start the game with the +multi option. To do this, right click on your Renegade/game shortcut goto properties goto the target box and at the end add +multi

Now you can load 2 instances.
