Subject: Login issue
Posted by Rsin on Tue, 10 Jun 2008 03:46:01 GMT

I was getting the invalid password error when trying to login under my account, so I reset the password. My problem is that when I go to advanced game listings it auto logs in with the wrong password, and doesnt give me an opportunity to enter the new one. I can't see any option to disable or change what it auto logs in with. I'd prefer not to reinstall the game if there is a better way to remove the bad password.

When you click on Westwood Online, go to the sidebar on the left and click "My Information". Select the name at the top, then click "Delete Account" (don't worry, it just removes the information, it doesn't actually delete the account). Uncheck "Automatically login with this account." Click Okay and go try to login.
