For some reason patch (1.0323) of RenGuard
automatically closes when i push "Renegade" in the bottom left corner. It should work considering
it says

[12:22] Trying to connect to server #1...Connected!
[12:22] Secure link established.
[12:22] Welcome to RenGuard, TsZMaTriX!
[12:22] To launch Renegade, please click 'Renegade'.

But for some reason it just closes and re-opens. and i can never get to play. i have tried
re-installing it and turning off the computer multiple times but to no a vale.
Any help will be much appreciated!! thank you

RenGuard minimizes to the tray when you click Renegade. This is normal.

ya but is it normal. when renegade does not start after pushing renegade.

this is what happens...
I click renegade it minimizes to the bar.
Then it comes back up to full screen instantly.
and then renegade wont load......

Try loading renegade through game2.exe (in your renegade directory) and tell us if that works.
