I am not sure if you all remember me from a long time ago, the one that was making the Terminator MOD for Renegade.

But anyways, I have come back to the community just recently and I am wanting to start a mod, but I have a question.

Is it possible to make maps for renegade that are like Star fox, you know. You fly the plain and the map goes through, and so on.

Like the scrolling effect it does, or what ever it is called in 3D.

If you all don't know what I mean, I mean like this

Thanks,
N1warhead.

I douth it, if you could it would require some type of uber coding.

Oh I remember that mod by the way, do you still have any assets for it?

Damn, I was wanting to make a Star fox like mod lol.

Guess I will either make a WW2 mod or a Armymen like mod.

Don't know which one to make yet, depends what everyone wants lol.

Really, glad to see someone remembers it.

Sadly I don't have my models or anything anymore, unless they are hidden on my external HD somewhere lol.

But other than that, sadly I have nothing left of it, all that hard work. GONE lol.

Well we could start making an Armymen mod if you want?
I am a map person to be honest. I love making maps. But I can model anything but characters lol.

but do you think an Army men mod would be cool?

If so we can start one like it if you want.

Who don't like plastic toys going to war, destroying each others bases lol. .

Yea sounds like a fun mod I wonder if it would be possible to make the plastic armymen melt when attacked by a flamethrower that would be awesome.

I don't think that's possible with out source code though sadly =(.
But if you want to make an Army men mod, we can try.
We can start a team or something, I am like a Level designer, I love making levels .
