So, I was thinking what about changing the main menu background screen to celebrate the many years of Renegade and the new patch?

A official competition could be held by TT that would invite people to make new menu backgrounds and then after a month or so hold a vote to pick the best one?

I like this idea but I'm not sure ea would like it. Is it worth them disagreeing for a graphical enhancement?

They could disagree on many things, but don't see why EA would, if they did, it could easy be removed.

I know like most things, they will not approve the first patch release right away, am sure they ask for something to be changed or edited the first time around.

<http://www.frankklepacki.com/>

Look at the Renegade Menu Theme there. Sounds quite a bit different than what's actually in Renegade, no?

Somewhat off topic, I know, but I think there were different menu plans was my point. Wonder what else there woulda been?

No! The button format cannot be changed, I can get into Jelly[mini-aow] with my eyes closed clicking the appropriate pattern of buttons.

renegade usually has about 600 people, 550 in wol and around 50 using other methods of connecting.

I think when this patch is released it could bring some activity back to ren, ren has suffered a lot over hackers, and this does put players off.
