Screen-mates are in a section of the internet plagued with malware. Steer clear of them whether they are cute or not!

PS: http://en.wikipedia.org/wiki/Bonzi_Buddy

LOL.

Yes, keep away from things like that, it fucks up your computer.

I remember back many years my dad installed it for me...it was Bonzi buddy cute green parrot bird. I really liked it! But then he suddenly uninstalled it...

I now have Doom Marine! Free of spam and hes good too!

I don't think so, seeing as in order for it to operate like a Bonzai Buddy, it'll need to track your history, browsing habits, etc.

What is it that you need it for? You might be good with 'Google Desktop' , which will do similar functions.
