My friend, you must not know the wonders of a website known as Game-Maps.NET, where you can find almost everything for Renegade.

Download the AI BOT mappack here: <http://ren.game-maps.net/index.php?action=file&id=326>

The new version of Roleplay 2 has a deathmatch mode, where you can also have the option to play with some bots. Their AI is also pretty good, something surprising for Renegade.

The AI is still not nearly as realistic as another player.

EDIT: If you want more bot maps

DustBowl

Nod campaign 2 (haven't tried it yet)

Garth 3 (Height-field but still fun)

You can simply modify the bots presets in LE to make them a real hard enemy. Possibilities are increasing there hit chances, rotation speed, line of sight etc. On this way you can mae them never miss, let them see you at the other side of the map etc. Just play around with the settings

<http://www.freewebs.com/renrenpoo/maps.htm>

There's some maps I mad on here in the past with bots. Two of them you'll need to make sure you have a version of scripts with the teleport script though.

The bot ones are Mutant's revenge, Mutant mania, and Covert attack (kinda single playerish/co-op), M08 bots, and Lone guardian (these two are more multiplayerish)

A little off-topic here, but didn't renhelp.net have all fanmaps on one page?

I cant seem to find it anymore...I know it had a lightblue background and individual downloads just like renhelp?

Wow, that site's still up? I noticed the renegadecentral.com domain isn't working.
