Download both weapons then take the file for the red laser and place that in the data file.

Should work, unless the weapon is one whole thing.

anant, out of interest how did you find out about Game-Maps.NET?

I am a member of the jelly forums. People share skin web sights.

And when i asked about where to find skins for this forum i was given a link, is there something wrong with me going to Game-Maps.net?

And when i aksked about where to find skins for this fourm i was given a link, is there somehting wrong with me going to Game-Maps.net?

There's nothing wrong with going there, IronWarrior owns the site so he's just curious as to how you found out about it.

Protip: he actually LIKES people using the site

Yeah, I'm glad when people use the site, I spend a lot of time working on it.

More people using the site the better.

And am glad that my idea worked.
