
Subject: RGH File?

Posted by [jayson](#) on Mon, 21 Jul 2008 18:44:37 GMT

[View Forum Message](#) <> [Reply to Message](#)

I need to know if this is an *cheat name removed*File? It's very imporant to know. I know the first file is the one.. Is the 2nd file the same as the top?

C:\Documents and Settings\FrEsH\Local Settings\Temp\Rar\$EX00.843\rgh.dll

C:\WINDOWS\system32\dllcache\oprghdlr.sys. C:\WINDOWS\system32\drivers\oprghdlr.sys

[View Forum Message](#) <> [Reply to Message](#)

oprghdlr.sys

Quote:ACPI Operation Registration Driver - Microsoft® Windows® Operating System - Microsoft Corporation

Whatever the hell that is...

[View Forum Message](#) <> [Reply to Message](#)

The first one is a cached temporary storage folder containing a copy of rgh.dll, meaning you or someone on your PC has downloaded the .rar package of the full *cheat name removed*program before.

The second comes with XP service pack two, more information here after a very short google (Something I suggest you learn to use, perhaps).

I don't use it, Im a mod and this popped up on our server..
Just wanted to be clear on what it was before I ban.

TD wrote on Mon, 21 July 2008 15:27Lmao Fresh, you got caught cheating on clanwars.cc and now you ask here for help all undercover so you can cover your tracks...

Are you talking to me? I've never been in a clan war in my life.
I'm not even good enough for clanwars yet.

SOrry I'm kinda slow sometimes..

This message below popped up in our server as a warning for a cheat? I googled this below ...
C:\WINDOWS\system32\dllcache\oprghdlr.sys. C:\WINDOWS\system32\drivers\oprghdlr.sys

I found this

C:\Documents and Settings\FrEsH\Local Settings\Temp\Rar\$EX00.843\rgh.dll ...

So I was just see'n if it was a cheat is all.

I didn't come in here to get bashed and Im not this Fresh guy you speak of.

Thank you.

Erm do tell how your server pops up with that message.. I'd like to know when we had a auto
*cheat name removed*finder built into the FDS.....

Its a personal bot we have on server. It scans for *cheat name removed*and other cheats. I dont know how that popped up. I've never even seen it before.

I swear all C&C clanwar people are ego's and paranoid bitches.
I come in here to ask a general question and it ends up like this. Get the fuck over your selfs. Get a fuckin life and stop being pricks. All I wanted to know is a simple fuckin question.

It was a simple yes or no.

I won't ever ask anything else. I can see all of you have a heart attack over it!

[View Forum Message](#) <> [Reply to Message](#)

To answer your question, no it isn't part of the cheat.

But just so you understand why they are all being pissy... it is because, if you are in fact telling the truth, your server's bot is an invasion of personal privacy.

It has no right to scan the player's C drives and report to you what it finds. Even if it is to stop cheating or not, it is not right. I strongly advise you to remove that function from your bot or else there is going to be a BIG problem later on in the lifetime of your server. It may even ending up costing you money.

Romaner wrote on Mon, 21 July 2008 17:20well all that i am saying is that i like my privacy and except for renguard dont need any other program scanning my pc...

Renguard sux anyway, You can still bypass the cheats.
I used renguard when I first joined the renegade community.
It crashed on me often. I played servers without it and I didn't get so many crashes.
I'm happy bots are picking up the cheats now.

I'm sick of playing this game and getting a headshot from nowhere.
I don't enjoy playing this game at all when people cheat so i don't care what it takes to get cheaters. IF a bot has to scan my PC to make sure I'm not a harm to the game I'm fine with it. I have nothing to hide.

You don't understand. It doesn't matter if you are fine with it. It is ILLEGAL in many countries to do that and you can get ARRESTED depending on where you live!

It doesn't matter if the person being scanned has something to hide or not, you are scanning them without their consent, and that is an invasion of personal privacy. It is a very serious issue. You are basically spying on all the people who join your server.

[View Forum Message](#) <> [Reply to Message](#)

The server cannot scan a clients computer unless the client has the corresponding program to go along with it... Unless your server is actually HACKING into the clients computer in which case someone will be going to jail.

You guys need to think about what your freaking out over. Renegade does not come with software that will "scan your computer". Whether this guy has his question answered or not he's lying if he says it does it automatically. You would need a client side mod.

If you don't have any computer knowledge please stfu and stop flaming people. I know it seems to be the trend on this forum but get over yourselves you don't need to be a part of every topic just to say random crap.

Well thats the end of my rant. Goodnight.
