Would it be possible to add Widescreen support to C&C Renegade?
All characters are looking strange.
And some monitors (like mine) are stretching 4:3 to 16:10, no black barrs are there!

EDIT: This screenshot is with scripts 4.0, it's not with the stock game. Don't construe it as
otherwise, cncfan

That is not working. That is pathetic because it's stretching a 4:3 picture to a 16:9/16:10 display.
