I am making a new Weapons Factory door, i've made a box with the size i want as the door. So what I want to do is making a couple of windows in it. I just want to cut out a piece and then paste a plane in that position which will be the window. But i can't cut a piece out of it when i try i delete half of the door,

I need to know how i could do that.

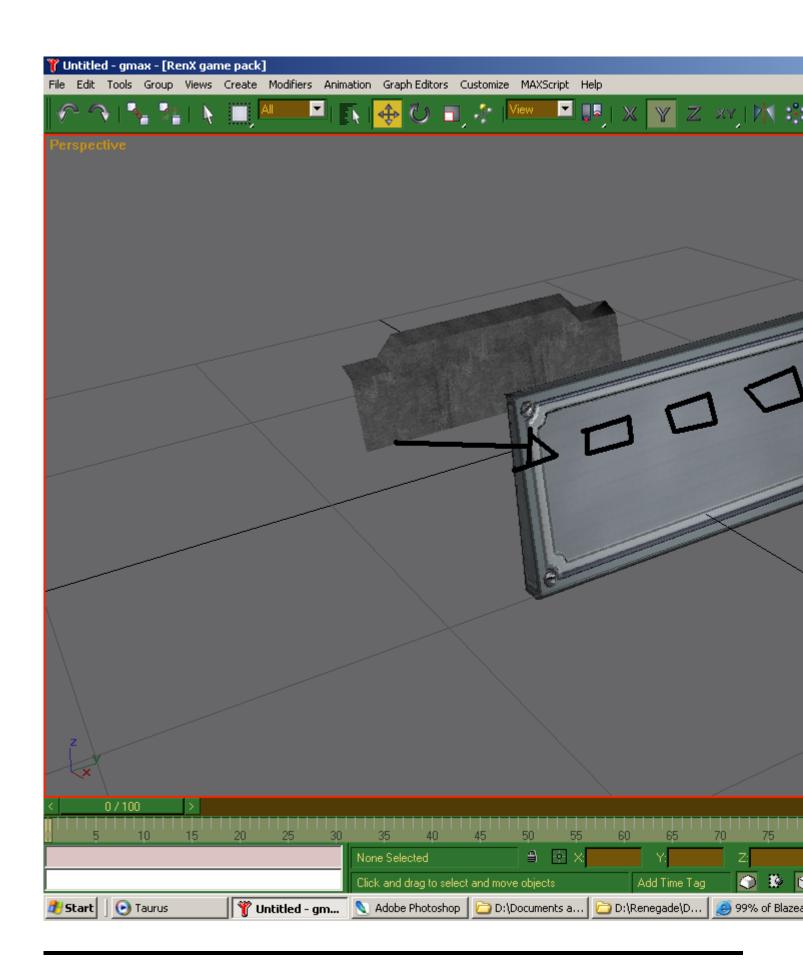

SS->

What you can do is this ->

make a box the size of the windows you want to have.

Copy it three times.

Place them directly inside the door. Then use the booleantool to cut out the spaces. Then you can easily look up the 4 coordinates of the cutout space and place a plane there.

Hey.

There is a tutorial of a house in renhelp.net It also includes how to make windows.

http://www.renhelp.net/uploaded/perma/smallbuilding/VTutorial.swf

Enjoy.

Edit: You need 3ds max 8 tho

Need help 1 more time

Allright i thought a window wasn't the best idea. I have made a animated screen in that place. You will see some nice chicks when it works properly.

I have all the settings right. But i need to know how i can make the screen go down instead of to the right. Because then you can see the other woman to:)

UPerSec=0.0

VPerSec=0.0

one of them is supposed to be 1.0 for going down, since yours goes to the right, you just need to make the other 1.0
