Hey guys. I'm new here

I have some problems with my server:

When i use JFW\_Zone\_Character or JFW\_Character\_Buy it crashes the server. The second i get in that zone, my server restarts it left

Can anyone help me, please.

Did you put what character you want to buy and how much you want it to cost?

You probably have either created a new character preset that the client doesn't have or the script has some settings left blank.
