For GDI Harvester.

Possible to play with it online.

Just learned how to animate screens, so decided to put some kind of TV on the back of the harvester ^ So you harvywalkers out here are lucky!

I also gave the harvester some nice wheels and on some parts nice reflection!

Here a video to show off. (goes slow tho) its a youtubelink. The pictures i have used for the screen contains nude carmen electra images, so only 16+ are allowed to watch i would say ^^ ->

WOW i love it! and the Pictures are damn awesome! nice work

Edit its crashing my Renegade the reflective part works but the back of the harvester have a missing texture, when the harvester spawns then my ren crashes after 2 seconds

The video was still processing Its strange tho that your renegade crashes, because the modelsize is only 134 kb.

I see in w3dviewer there is the missing texture 18v_nod_hrv_fan.dds But i didnt use that 1. So its complete

When you get it could you upload it on game-maps.net? Because these sites arent work for my country.

Di3HardNL: Nice work.

looks nice, but the tv in the back could be better.. maybe having a border type thing to make it
look like a real tv and have it sticking out. you could also change the harvester itself
