I'm tired of the stipid loading pressets tree screen i use jon wills version of LE and renegade demo. I fixed registry to Westwood>Renegade>InstallPath... i still don't have any presets and no folders in mod folder except Editorchache and level i created a presets folder put objects.ddb and it's stuck when it tryes to load *Mod folder name*/characters/DUMMY.w3d. I don't remember how i fixed this problem on other pc.

Did you set it to C:\Westwood\Renegade\Renegade.exe ?
Not just to the directory but to the executable itself.

(maybe different location of course)
