Now i never had this much trouble with ren  
well i got this error message

iv gotten the same error message with game.exe and game2.exe and renegade.exe i put all them to admin and xp sp2 compatibility mode and still nothing except...game2.exe game2.exe loaded up ONCE but didnt do it with RR but now gives that error 2 i have reinstalled ren completely but yet most of it its not working or crashing after a while... also every time i highlight some files in my westwood folder my explore.exe gets 50 % CPU and it freezes explorer.exe and i do got some windows services disabled in my back ground if they might have anything to do with it....but never stopped be from playing any other games

Also i have

1.027 update or w/e it is

rg

cp2

few skin files

3.4.4 scripts

rp2 scripts and files

RR (newest)

and stewies reticle pack which has a new binkw32.dll file..(i hope thats not it)

RR is pretty much incompatible with Stewie's reticle mod and scripts; not sure why you installed them all.

cmatt42 wrote on Mon, 11 August 2008 16:15RR is pretty much incompatible with Stewie's reticle mod and scripts; not sure why you installed them all.

i put back the old dll files (left otehers one sin dont thnik they do anything) and sitll nothing...when i run game2.exe in xp sp2 mode it works 10% of the time but does not load rr....its some wierd shit

with stewies reticle mod and edited dll file game2 does work but does not load RR without it i load game2 but gives me that error saying RR launcher wont load so with it game2 dont load rr and works without it game2 dont load with rr or without

EDIT: reinstalled ren with only patch+cp2+3.4.4+rr and still same errors

Try installing with either just jonwil's scripts or just RR.
