i get this when i press renegade on renguard

i never used to get this but since i installed it again i have
ive installed the update and renguard what else is missing?

Core patch two, so you get a NO-CD patch.

Installation instructions: here

ok i downloaded them
put them into the data folder
ran patcher and got this

That's because they aren't supposed to be in data folder but in renegade folder!

i did that
and said couldnt find patch file!
doesnt matter now.
i replaced all maps with the new ones!

opened up renguard, pressed renegade still get the instert cd problem!

You need patcher.exe , a new dll and patchall.zip in your renegade folder, then run patcher.exe.
