I have a few questions.

1. If I make a mod for my server, will other player, who dont have the mod, still be able to join the game?
2. How can I for example use the command !rail and then you character will obtain the railgun, is that modding or is that possible on other ways?
3. When I create a map, can other player also join the game and play my map?

Thanks!

1. if you know what can't do, well, players would be able to join a modded server, just keep in mind you can't add everything  
(<http://www.renhelp.net/index.php?mod=Tutorials>)
  - 2.that is done with scripts, srry, don't know much about that
  - 3.No, they can't, unless they download it (this might be however possible in the further)
-

Is there any place where I can find premade scripts for a server?
