http://www.renegadeforums.com/index.php?t=msg&goto=348134&rid=24163#msg_348134

Go there for the C-130 editor page. If you would like to get modds, look here, for I will be updating this ALOT!

This is a NEW mod that lets you drive a turret on nod. Here are some pic:

... Glitches, only works on a server you host, or multiplayer practice (same with ALL C-130 mods). The turret fires by itself, you can't controll it. You actually can't enter the turret, but an invissable chameleon you get into, and the turret goes on top of that. I have manny of these types of c-130 mods, If you like, you can make a request for a mod. Making NEW power-ups is not possible via c-130drop fies. Also, you have to w8 untill the C-130 has left, a litle while after, the Turret will spawn, for glitch issues.

NOTE: There are A-10 mods on the C-130 EDitor Page, check it out. Got 2!

-Contact me here for bug info and or sugestions.
=Samous

PS: Instal by putting the cnc_c130drop.txt file in your renegade data folder.

Dirrectory:

TFD: C:/Program Files/EA Games/The First Decade/Renegade(tm)/Renegade/Data

Normal Renegade: C:/WestWood/Renegade/Data

NOTE: Dirrectories not spell checked.

[View Forum Message](#) <> [Reply to Message](#)

Here is another new post of my work. This little, but really hard to make, mod took a long time. What it does is have an A-10 fly over, drop a purchased veh, then have a C-130 fly after it and drop a Recon bike. Install just like above, but don't install the picture.

NOTE: this is the same mods as the one listed above, where I asked for help. With the harvester, sometimes the reconbike will flip upside down when dropped. Here are a few demo pictures:

-Note, for modders out there who want to mod their own, it is ok, but hard. For that reason, I listed the area where you should add drop scripts. BE VERY CAREFUL OF TIMING!
=Samos

There is a short video I made of the whole thing, but the server doesn't want to upload it, the second I hit upload (after I hit browse) it says "Internet Explorer can not find this webpage".

[View Forum Message](#) <> [Reply to Message](#)

Here is a c-130 drop file that I made. It is semi-funny. The C-130 has been replaced with a A-10, but the vehials you buy drive off the top of the A-10. Really Funny When you see it. Demo Picture added at end of message. To do this to your c-130, you must first install the cnc_c130drop.txt file in you renegade dirrectory.

Defaults:

TFD: C:/Program Files/EA Games/The First Decade/Renegade (tm)/Renegade/Data

Noraml Renegade:C:/Westwood/Renegade/Data

This file onlt takes effect if you host your own game, or play multiplayer prcatice.

The A-10 mod can be used on line, but the A-10 will not appear.

To remove the mod, simply remove the cnc_c130drop.txt file.

-Have Fun
=Samous

The Roll_off_a10.bmp is the picture above, themod is the cnc_c130drop.txt file.

Turret worldbox needs to be bigger (vertical), I assume you copied the skeleton from another vehicle

Subject: Re: NEW C-130 MODS!

Posted by [samous](#) on Sun, 24 Aug 2008 19:08:45 GMT

[View Forum Message](#) <> [Reply to Message](#)

I'm not shure what a world box is.... but yes, I did use another veh. The turret's and chameleon's bones "Wheelp01" are connected, so you drive the chameleon, an the turret is stuck on you. Do you know how to increase the "worldbox"?

NOTE: I'm only editng the cnc_c130drop.txt file.

[View Forum Message](#) <> [Reply to Message](#)

Open the model in gmax, and press "H". Then select the Worldbox and scale it.

NEW!

This mod gives you a SUPED-UP APC!

The APC has:
600 health, and 600 armor (originally 300/300)
Tech/Hottie Repair Gun
Repair gun used in SP (has a repair attack function)
Rocket Luancher
Volt
Ramjet
Pistall
Flame
Stealth
Regenerating Health/Armor

COOL HU?

These weapons are controlld buy the #s on the top of your keybord. The only thing it shows is the amo, not the # and weapons up on the top of your screen like if your an inf when you change weapons. Here are a few pic of weapons in action, and the APC:

-Install like all others, insert the C-130 file in your data folder.

[View Forum Message](#) <> [Reply to Message](#)

Ageing, I'm only editing the c-130 file, not making a new veh. GMAX can not be used. I just have the veh being used as a skin for the chameleon. I'm not going to use gmax to edit th world box of the chameleon, b/c some one might use the chameoleon alone, without the turret.

[View Forum Message](#) <> [Reply to Message](#)

Actually, I use other po=eoples ideas, and morph them ENTIRELLY into mine. I COMPLETELY change the original thing to my likeings. For instance, the SUPER APC idea came from

shamus2k3's mod, where it was a Supa-Buggy. The veh weapons and armor are different, but same basic idea. Also, my apc is a little more fair, its not invincabe or invisable, just stealth. Also, If anyone has a suggestion for a mod, plz post, i'm in need of insperation.

[View Forum Message](#) <> [Reply to Message](#)

NEW!

This is a verry cheasy mod, but it works. This mod spawns a signal flare to tell you where the c-130's cargo will land, then dissapears after a while. Simple, but unique (not really). If you like, I can add this to ANY c-130 mod.

PICTURES:

install like all others, just put it in the data folder.

NEW!

This mod replaces the C-130 with a Submarine! Few problems with it, but untill I update it, LIVE WITH IT, or post a way to fix them....

PIC:

Glitches/BUGS:

Sub flies sideways.

Sub doesn't drop off cargo, but has the cargo spawn at the air strip till it passes by, then the cargo moves.

The second the sub "drops" off the cargo, the top hatch flies open and rotates in a propeller like fashion.

Sub is not civ, like C-130 (c-130 has a 0 with a line through it, while sub has a nod symbol).

-Install like all others, in data folder.

You do know that nobody can see the stealth effect from a drop mod besides the person who runs the server, right? Same with the different guns on the APC.... To the server operator it will look like different guns, but to a client it will look like the normal APC machine gun.

I haven't drop modded in a long time but the only way to achieve stealth is with the Mx0 one... (Mx0_nod_obelisk_weapon_DLS)? Does that sound right? But even so when you shoot you're still going to be invisible with this script.

Which is why you need to check what's been going on since 2001 before you speak. Stealth can be enabled on units if the server and the clients have bhs.dll installed (any version iirc). There's a few scripts to handle stealth behavior in said versions of scripts.dll, and you can find those by looking in the readme files in the scripts zip archive.

OK.... I lknow I haven't updated in, FOREVER, but thats for a reason. I have been working with MS-DOS BATCH file (.bat) and making my FIRST C-130 EDITOR! So far, I'm still gtting the hang of it, but there is a completely useless version of my editor that I will be uploading on my C-130 EDITOR page (follow any link that goes to my mods). If anyone here has experiance with .BAT or .CMD files, I would apreaciate some help. In ONE day I have finished 10 menuse, and only finished 1 persons mods.

Also, I will be realeasing a FLAG mod, thats just like the Flare mod, with my C-130 when it comes out.

And... Death I did see you on atl4ntis. I was right. I saw you again.

Even More.... (getting tired of me yet?!) I'm still working on mods, Editor, and Atl4ntis stuff, also with school, so my hands are a little "tied" up at the moment. I apologize in advance if I don't reply quickly.

=Samous

Don't bother me, I'm busy (in other words don't PM me).
But if you would like to talk, say so in my pages.

New MOD!

This is a mod that adds a flag to a nod Vehicles. Verry simple.
I will be adding more flags on move veh in different places, but untill I realease it... you can't gte any of them. Here are some screen shots:

LOL, look at the flag, at what's called:

...If you have any I dea what the bones I should attach the flags to, please say so, bc IDK W3d STUFF!

THE C-130 INSTALLER FINALLY OUT! WHO HO! The installer includes my mods, shamus2k3's mods, and mending's mods! Full Beta out now!

INSTALATION INSTRUCTIONS:

Extract the "SAMOUS MODS" folder to the renegade data dirrectory.

TFD:

C:/Program Files/EA Games/The First Dacade/Renegade (TM)/Renegade/Data

Renegade:

C:/WestWood/Renegade/Data

After extracting, run the program C-130_INSTALLER_1B.exe. follow instruction provided in program.

New Mod, with release of C-130 Installer V1.0 Full Updates!

I made a new Tank, The mushroom tank!

Its a chameleon with a mushroom cloud around it, lol.

Also, there is a Flame tank (ai) that you can't enter that will fire at any nearby enimys!
Extra health and regeneration health for both Ftank and Chameleon.

Pictures:

Mod will come out with updated C-130 Installer!

I'm working on a parachute drop, where a parachute drops the purchased ehicles in a parachuting animation. There are so-far these bugs, really funny:

More info soon!

Also, I'm expecting feedback on my C-130 editor, so I can finish it and make it a Full Version. Or,Have Update 1.1 uploded.

=Samous

Note: Maby I can make a Construction Drop type mod, where the veh are created infront of you, not just spawned. (like pictures)
