Editing the Vehicles with Edit_Vehicle on the F8 command...

you can abuse it with some tricks, no1 knows how to use it ?

Press either F8 or the tild key on your keyboard and then type i9n edit_vehicle
A higher suspension allows you to scale higher terrain, but most of the other settings will make
you ice-scate.

Are you running RR? If so, then that's probably why.

edit_vehicle should just be disabled for this patch. (For Client only, not local hosting/server.)

A higher suspension allows you to scale higher terrain, but most of the other settings will make
you ice-scate.

Just press F8 and type in "ED" thats enough same for extras just type extra
anyways with this glitch i can still shoot above walls/throught walls :S
(used it on kamuix server because some ppls spammed with defences)

I thought the driving wasn't affected by edit_vehicle because the server automatically tells you that
your not allowed to edit the vehicle and hence the "ice skating" affect. The client say it is in xyz,
but the server overrides that saying that it is in abc..

Someone who has checked the code might be able to say a more definiate answer.

The shooting is different though.

It is because of the no-gameplay pending patch from v00d00.
The server "thinks" it is a 1 player game and thus allows it to be used.

Ok, thanks for the explaination zunnie. I guess the easiest and best way to fix it is to add a check
whether the client is a nondedicated server.

i duz not work online for me i use the suspension scale, weight, max torque, and turn torque (if u
set it to 10 u can turn ur tank in a helli xD, it will take off if u spin but it will get on side and blow up)

in rr it's good, but if you come over a powerup or shoot or damage something it spams that you can't do damage etc.
