What is the best free cam that records sound. I tried full version of fraps bu the sound is very low and muffled. I need a good game cam that records audio very well. Please post where o ge the full version of a good cam here.

Fraps should record what you hear, unless you compress it wrong or you have a bad sound card.

You could try GameCam though the free version doesn't record sound and places a watermark on it...

Camtasia Studios is also a good program for recording and editing, I personally use those for the Renegade X ingame stuff.
