I tried the site and the link on there goes to filefront, which, to put it bluntly, is shit as i cant even begin to try and download it.

I tried a version i downloaded, but going online with it and finding the server shows it as greyed out.

1.3 had a few issues with bugs and isn't being used anymore. Hopefully, we will have 1.4 out soon which should resolve all these issues.

Oops, my bad. I was referring to 1.3.1 in my post above. Sorry for the confusion.
