When i got there i lost count of how many times i died at. when i lost track i was at 20. But i beat it all you do is RUN down the ramp behind, you and hide there and the stealths will follow so just kill em. but dont stand still, becuae petrova is cloaked just use a flamer and flame her head off once you kill black hands. then just walk up to sidney and get out. hope it helps.

I died a couple times...well, 6, but the 7th time was easy. I just made sure I was all 100% and got the laser chain gun out. Once the movie played I unloaded on the stealths just strafing around the center column where the health/armour is. Took out the stealths then switch to the PIC and took out Petrova in a matter of about a minute. When she finally died I had full health and had armour.

I've done this twice now on the hardest mode in the game and trust me its hard but the easiest way to do it is to backup and run down the ramps to the ground level while shooting at em.. when i did this i had jack **** ammo i killed petrova and then before going to sydney went and cleared the area where you take her then took her there without her getting hurt Didn't get no f*cking

bonus level heh

tip for anyone who get killed within the first few seconds-Although you can't kill any black hands before the seen and the fight begins you can take down the tiberium beasts in the cages with your sniper rifle. Then take out your chain laser cannon. People say that the PIC is best but trust me the chain is better for this. Carefully walk backwards whilst shooting down as many of the black hand as possible. There should be loads of health packs on the stairs so run to them. If you try to run downstairs you find that Petrova and a load of black hand are somehow in front of you. FIRE With the laser chain you can have a constant fire so that when the black hands fall down you can keep it on Petrova so that she doesn't fire at you! I don't even know what type of gun she had! What was it by the way?What do you mean "bonus level" ? Are there some more sort of hidden levels for when you do it on commando?

At the bottom of that place there are respawning health and armor packs, very usefull in this battle.

LOLActually, I came UP from the bottom, fighting my way through the basement, killing every single soul down there and up the stairs (lots of black hands!).I too stopped counting the number of my own deaths after a while, and it was really frustrating. I checked how close I could get before the cut scene started playing. Then I thought "why not just kill those creatures in the cages, stupid me!!" *smack* and so I did. But I still had 4-5 black hands to take care of in addition to Petrova.. After a few more deaths, I discovered the reason those 2 health packs are behind you

while backing up and down to take cover, picked up the health packs as I was really low on health during the 2 seconds or something taking so many hits from them (and Petrova, I think). Then moved down a bit and into the wall. 2 black hands came down after me and I killed them with 2 shots from the ion cannon. As soon as I could get an opportunity, I got upstairs again and ran like hell to get inside the cage on the right side. As soon as I got inside I could save (!) my position and peek around the corner and kill the last black hand and then Petrova, which was not much of a fighter anyway Hidden

What was Petrova's weapon anyway?

The trick to beating all those black hands is to get your grenade or rocket launcher and let em have it. If you get damaged then go down the stairs and wait till the health & armor respawn keep doing this till there all dead then take out the acolytes with the laser chain gun As for petrova, keep moving and when she stops to shoot ya with the tiberium rifle get ure ion cannon out and point it at her mutated head!!!!The ion cannon is a great boss killer!!

Even though he's got a freakishly awesome gun, he is absolutely crap with it!!!The best weapons for this level is either the flamethrower or the chaingun. Use the rocket launcher on the **** annoying ceiling guns. as ure running through that long driveway where u met HEAPS of vehicles the level before go into the room on the left and get the Tarantula laser chain gun (finally a good gun!!!) and use that to great effect. The hardest part I found was when u go up the lift and theres ceiling guns all over the place (about 6 in total on hard) and black hand stealth guys as well as acolytes and templars. First hit the two ceiling guns with your rockets then start looking for the black hand shooting your ass behind u. Get him down and then flame the LARGE group of acolytes,templars & black hands. Get all of them out then finish off the rest of the ceiling guns with the rocket launcher. Once u get outside use the sniper rifle while mobius toasts the officers with the chain gun (finally he kills something!!) remember to get the stealth tank or mobius is a gonna. After that go the GDI chopper and Gunner will grab mobius for ya

I just finished there in one go. Petrova is using someing like tiberium auto rifle and she is stealth. I suggest you fire at her first then run down the ramp and she will follow. It will become one on one. Use energy weapon such as Laser rifle, laser chain gun, volt auto gun and personal ion cannon. Her weakness is the same as Raveshaw which is she will be stunt by the energy and unable to move longer compare to Mendoza. I found out that if you shoot at her the cutscene will start.
