I heard that if you play the practice on other maps there wont be any bots...

are there any fixed versions anyone is aware of, and if not how would i go about trying it?

and also what does scripts344.exe actually do to the game?

Scripts 3.4.4 is an updated scripts by Jonwil. It loads the game a lot faster and gives new scripts to play with in LE. For 3.4.4 you need DirectX 9 otherwise get scripts 2.9.4 .

As for bots, you could download the Bot mappack...

i wonder if the grid will ever actually be done. or maybe its finished and it slipped by me.

Renegade only came with one bot map, and it's on under. There are however, as said, maps you can download with bots.

Here's some sites with alot of maps:

<http://www.mp-gaming.com/>
<http://renegadezone.com/>

Hope you find what you're looking for.
