Hello, my nick is samous. I'm a verry good builder for the Atl4ntis serve in Renegade, but when the server crashed not too long ago, the mother bord burnt up. W4RNING ,the owner of the server, had to get another, witch heppend to cost 100\$(canadian). B/C this is alot of \$\$\$ I have decided to take picture of my, and others, work in ATL4NTIS. Contained in the zip are picture i've taken B4 the crash. Hopefully, with support raised here, I can both 1:Earn \$\$\$ for ATL4NTIS serve; and 2:Get more player on the server. But first, you should know some commands. If you never played there, go here for a list of commands to help you.:<http://www.renegadeforums.com/index.php?t=msg&th=30176&start=0&rid=24163>: Here are some piucture of buildings made in-game. All of these are presets, or objects that have been saved i the server, and can be re-made by typeing certain commands.

ATLANTIS its self:

Missile Gun Boat:

Dino Prison:

More soon.

NOTE: Due to server crash, not all picture could be taken. I will be adding more, but untill then, post some pictures of good works your self. IF ANYONE IF FOUND OPENING OTHERS FILES IN ATL4NTIS OR IS TAKING CREDIT FOR OTHERS FILES, WILL HAVE TO SUFFER THE CONSIQUENSES. W4RNING has a jail in-gmae, ad he can jail you. If you are jailed, you can not use any commands, and can't leave the jail (unless you leave server or W4RNING lets you out).

EDIT: AT THIS TIME THE FORUMS WIL NOT LET ME UPLOAD THIS FILE, PLZ W8 FOR IT L8R.

I'm surprised W4RNING can't afford a new motherboard, he does have his own ATL4NTIS committee he could raw funds from They don't cost that much unless he wants something hi-end with more slots than a fan grill.

A crashing server wouldn't damage your motherboard, sounds like he is trying to scam money off people.

It was probably the other way around, but it was assumed the crash caused it as the visual signs of motherboard decay would be delayed compared to the crash.

I still wouldn't surprise me, his reputation is against him.

Firt off, what do you mean "I still wouldn't surprise me, his reputation is against him"? Second, W4RNING did have to use his old system to play the server, and did gain money from other people, even got the motherbord now. IDK how it happened, but I do know its possible for problems to occure with the mother bord, even if the server crash didn't do it. Third, W4RNING "Commitee" is actually a counsil, and those guys don't pay money. I'm in the "commite", but i don't pay. Althaugh i'm his friend...

BTW This post was ment for picture of atl4ntis, any good buildings youve made, not how BAD/GOOD w4rning is.

First off, the server rashed just last weak i think, not a few months ago. Second, the uploader isn't letting me upload right now, i will try as soon as i can...

Every time i hit upload, it says "internet explorer can not find the webpage". I hit refresh and tells me ther has been an error, and asks me to report it to the webmaster...

Upload the files to another host and link to them from here then. Perhaps imageshack, or even better, use n00bstories.

TinyPic.com is MUCH faster and you can upload Pics, Videos and MP3's (MP3's will be a video with just a black screen)

The connection was reset

The connection to the server was reset while the page was loading.

- * The site could be temporarily unavailable or too busy. Try again in a few moments.
- * If you are unable to load any pages, check your computer's network connection.
- * If your computer or network is protected by a firewall or proxy, make sure that Firefox is permitted to access the Web.

thats the error Fire Fox gave me. All i'm uploading is a zip file!

NOTE: I'LL TRY THE OTHER SITE IN A SEC

I've been scaling them down, but i will get back to you when my computer is up and running aging, it in the "shop" for repairs, lol.

=samous

EDIT: Why doesn't anyone else post pictures of their skilled works of art from the atl4ntis server?

i already tried making zip uploads, but i got a new file made by a friend called photoresize, what it does is you drag your photo on it, and it re-sizes it to 446x339 (or something like it). Once i do that, i will upload them in a zip file here.

=samous

EDIT: here are the old files, making new soon.
