Do you know Taximes, a renegade modder. He has made multiple C-130 installers, and he also made a lot of avatars on this site. If anyone knows where or how to contact him, I would appreciate it.

b/c I started making C-130 mods only b/c of Taximes' programs. I was making more advanced drop mods and I wanted to see if he would like to use them in his C-130 Drop Modifier. Also, he probably would be able to make requests I can do (more advanced drop mods), and help him out with his program. Since I've never been able to contact him via 2 E-mails, I have given up, and made my own installer. When I was looking through the avatars I saw, I saw his name on them, and thought about asking here.

NOTE: I also REALLY admire some of the things he has done.
