Reinstalling ren with everything working fine untill i hit the maps, its installed to 70 something percent done and when it hits islands.mix it crashes =/ any help?

EDIT:Im looking at the files that did install and other maps didi fine maybe someone can send me there islands.mix?

I'm assuming you mean those isos of Ren's disks on that one site, try redownloading them if not then they are corrupted and need to be reuploaded, small tip here: just buy another Renegade disk!

Tbh I wouldn't blame Vista for this one all the blame should be directed to the Disk Image(it is most likely corrupted), actually if you are able to try using it on another computer and see if it works.
