ACK-Checker Beta

Have you ever been flamed or pointlessly corrected by Aircraftkiller because your post doesn't meet his standards? Well my friends your worries are over! Currently in it's Beta stages, the ACK-Checker is an answer to many a forums members prayers. Based on the concept of the Spellchecker and the Grammar checker, this new application takes it to the next level. BAM! Simply type or cut-and-paste your text in the textbox, hit the "check" button and this baby will point out all the ACK-Errors so you can change them before you post your topic. Here's a list of just some of the features:

[list]Auto-correct ION to Ion

Auto-correct Gdi to GDI

Auto-correct NOD to Nod

Standard Spell Check

Standard Grammar Check[/list:u]Also, if you choose to ignore the suggested corrections, ACK-Checker will generate a suitable ACK response, ranging from the beloved classics "STFU you n00b!" and "You're a complete Idiot!" to new found favorites such as "OMG! No one even cares about that!" and "My opinion is the only one that matters!"

Post with confidence!

Not suitable for children under the age of 13. Void where prohibited by law. Tax, Title and Licensing fees may apply. Check your local listings for availibility. Coming to a forum near you.

Real bright, start up a topic for nothing but the purpose of insulting someone else.

You're on so much higher moral ground than I am. :rolleyes: I applaud you, please, continue - you're making a genuine ass of yourself.

AircraftkillerReal bright, start up a topic for nothing but the purpose of insulting someone else. Oh come on now. Don't you see how much time and energy this would save you? If everyone had this you could spend your time making maps or playing and you, too, would know that the forums are clean and safe! It's a Win-Win situation for everyone!

It's a joke. It wouldn't be so funny if it wasn't loosely based on the truth.

Come to think of it, I did forget to run my original post through the program.

Yeah, you're not supposed to start up topics to insult people, you're only supposed to insult people in topics that have already been created. :rolleyes:

Although it is targeting a specific individual, which is a bad thing to do, this is still pretty funny, and it could be a useful program, but Microsoft Word works fine for me. Although Word does not know the deference between Nod and NOD, and does not give you insults. If you know enough stuff about word you could use auto correct. Fixing NOD, ION, and what ever other problems you have with C&C lingo.

Suggestion - why don't you guys just use Renegade AutoComplete to do it all for you? There's no need to copy & paste your post into another text box or anything, it'd replace it where you type it.

Well I could use a spell checker. Someone should make one easily acessable like a sidebar icon I could open when i want to post. All though I pride my self on my spell and grammar I may forget at times. Serious someone should make something like this.

But you are exaggerating Aircraftkiller's personality a bit. I mean I have my fair share of dislike for people whose head is 5x bigger then their hand so to speak (I just thought of that now so you wouldn't understand.) Yet this is not the extremes yet.
