I would like the snipers to be able to go into prone position i h8 that they can't already....

I not fun sniping always running around never waiting for a target.

It would be very nice.

This update is to stabilize and correct the flaws in the game engine as well as attempt to eliminate as many cheats as possible. It is NOT for rebalancing the game or adding new features, contrary to popular belief.

This is a arcade style game.

Want realistic, go play America's Army.
