Dont know if this is known but I tried this on a rocket, If you shoot a rocket if you have it or a gunner or anyone who has it right when you shot press a number to change guns or change your gun when you do it and it shoots without losing ammo.

This isn't exactly an effective way to fire a weapon anyhow. What they make up for in ammo they lose in time switching weapons.

If it is a glitch its not worth their time to fix it.
