Yeah it was pretty hard getting him out, but just suss out where he's going, then pick off the security turrets in that area with a rocket launcher(more for your sake than his), then I used the laser chaingun on the dudes

Use the flamethrower, as long as you don't hit Mobius, you'll fry the mutants/noddiesby the wayNORSK?

Mobius can stand lots of shot from Nod but not from you. Try to use rockets to kill ceiling gun, Laser rifle or flame thrower on mutant and chain gun on man. When there is a large bunch of Nod fighting mutant use grenade launcher when they are close together or let them fight first and help the Nod first because they are a lot easier to deal with. Don't use sniper rifle. The last thing is to walk slowly especially turning so you do not trigger Mobius to run to the next part where he stops.
