C&C_Islands.mix Egypt

What It Does

This mod changes all of the texture's names in c&c_islands.mix. You can change change the maps's skins without affecting other maps. This is used for mutiplayer.

Installation

Backup your C&C_Islands.mix and then replace with mine

C:\Westwood\Renegade\Data\C&C_Islands.mix

Changing the skin

(Skin names not up to date check .w3d for names)

For those who want to change the skins here is a list of skins, just put the renamed skins in data folder.

C:\Westwood\Renegade\Data\

Skin's Not in Always.dat (Not Renamed) Originally in .mix

Added it to Game-Maps.NET now:
<http://ren.game-maps.net/index.php?action=file&id=1282>

Very nice work, i'm gonna use it, the original Islands got bored after 6 years lol

Thanks for this

I took some screenshots myself too with all settings on high and anti-aliasing enabled:
http://www.game-maps.net/downloads/renegeade/maps/screens/cnc_islands_egypt_1.png

http://www.game-maps.net/downloads/renegeade/maps/screens/cnc_islands_egypt_4.png

edit: I'm not gonna add this to the UberMapPack though, it is a modification to an original map.

Thanks blacky! This is what i wanted ^
I got 2 questions tho

I - Is it possible to change the lightmapping/lightning of the Islands tunnel and make it work multiplayer internet?

II - Is it possible to add w3d objects or emitters to a map and make it work online?

Don't forget to replace the palm trees with dates tree! It will make the map more genuine looking.
Dates trees grow in deserts.

#1 and #2 yea im sure you can you just import the map and re texture the whole map and add all the emitters with renx or 3ds max and then set all the w3d properties backup. This is the correct way to do it but takes a lot of time i just hex edited to change the textures so i didn't have to do that. I will try doing it with hourglass since Westwood gave the gmax version of it and is already set up.

do you have the g\3dsmax or gmax model of that tree

I always wanted to Edit Maps, but always got a Script Error by loading the Maps on 3DS Max, so i need RenX for Editing these maps ? i got a cool idea

depends on what you want to do you can add emitters and stuff and other models in le and still work for multiplayer that map just needs to contain the models and textures

its the file ref_roll.dds it looks cool with islands theme, but on other maps not i think Blacky forgot
to set other texture for it.

you must be using the old version because ref_roll.dds isn't even in the .mix , i had a glitch with changing the name of ref_roll so i removed it. I don't see that when i play other maps.

Edit: by chance are you using rxd or some other ren mod

if you are editing C&C Islands first rename C&C_Islands.mix to C&C_Islands2.mix but keep it in data. Then in leveledit where you added the tree to the map export it to C&C_Islands.mix. I do it that way and it works online

I am redoing the map C&C Volcano in Renx by the way. ^^ It takes alot time, since you will have to redo all textures. But its quite fun. also when you edit it in renx you can change the building exteriors. check out my HON hand

bad news i had a hardware failure, and 2 out of 3 of my hdds crashed and lost all data. I lost all my current work I have done in the past year lucky i was able to backup my map and some of my others works but i wont be able to get anything done soon unless my data wasn't erased on my D hdd where all my ren stuff was at. c drive lost all data which was just games and windows and something weird happend to my e drive which was more ren stuff and games. 1tb of space lol. now i get hours of fun reinstalling everything , and a unknown reason for crash least there not fried.

Edit: think they crashed cause c and e where on raid 0 or 1 and d was not , from now on every thing i do is being backup on my ftp
