Subject: Having trouble with Renegade Alert (not APB)

Hey all. I was wondering if anybody could help me. I have C&C the first Decade and for MONTHS now I've been unable to install renalert. I would go for APB but my computer can't handle it.
This is whats exactly said when I double click 'RenAlert993 setup.exe'....

"Unable to find the file 'WOLData.key' which contains important data for online playing. Please install Command & Conquer Renegade and then install Renegade Alert."

I have already installed Renegade, though I don't know if RenAlert works with The First Decade. I have tried the program that is supposedly meant to create a new WOLData.key but it always has errors, bothversions.
Please help for I have been stuck for months on end trying to get this.
Thank you.

I have The First Decade and I've never heard of Renegade Alert, so i'm guessing The First Decade doesn't have it...?

http://xhp.xwis.net/cgi-bin/forum.cgi?a=26;mid=13914 <-- run this first

Then, run the tool that's supposed to change your serial number, the newer version that's found deeper in the thread (1.1 I think)
