edit: changed, see below.

I'm making a DVD with all C&C-Video-Sequences from <http://www.ea.com/cncmovies>

1.

Unfortunately I'm missing 2 files from the english Renegade version:

R_L08.BIK (on the website: "Obelisk of oppression"; its corrupt without video data)

and

R_Finale.BIK (completely missing on the website)

Please, can someone upload these two files from the english Renegade version for me somewhere (rapidshare or something)...? They are big, possible also as flv or avi or something.

I own the german and the english version, but have the german version installed. i cannot have the english version on the same computer, because it would change all registry settings.

And I cannot open the cab-files on my english renegade-CD...

2.

Are on those website really ALL video sequences from the C&C games listed? One missing I already found....

Are the videos from "The Covert Operation" also there?

And those from "Counterstrike" and "The Aftermath" (RA)?

Those Expansion sets are not seperatly listed like Firestorm...

well, making a mod like the museum mod for the community cost hundreds of hours.

but if one is asking for upload of just two files, which everybody with an english renegade version has, this seems to be ask to much....?

this is really sad, guys....

Now, now, there's no need to be impatient. It's only been a day.

I'll be uploading the requested files each in their own .rar archive. I'll let you know when they've finished and I'll give you the links.

Hey, wait. If you have the English version, you can get the files you're asking for without installing the game. Just put in the Data disk and click Explore CD when the autorun menu comes up. You'll find those files right on the disk there; you just need to copy them somewhere on your hard disk.

Anyway, I have uploaded R_L08 for now. If your Data disk is unusable as per above, let me know and I'll upload R_Final (uploading with ADSL takes a while).

No, they have no Ren-Movie files.

So, just the english R_Final.BIK remaining...

They're right in the disk's root directory. You don't need to dig in any cab files. That's not to
mention that the only cab files on the Data disk are for the MOHAA demo.

Ok, then I have to ask the board administration:

I made ATM from Tiberian Dawn, Tiberiun Sun, Firestorm and Renegade complete "Movies" from the game video sequences.

The read alert stuff will follow.

It's possible to watch them a little bit like a "real" movie, concerning the plot.

Because EA offers all of this video sequences on their homepage <http://www.ea.com/cncmovies> for watching and IMHO downloading with a downloadhelper (and TD is free for download), I ask:

My I upload and share those movies, concerning the copyrights?
