Check out my newest modification, I hope you like what you see!

Thanks to Scrin for making the video for me

-----> <http://www.youtube.com/watch?v=mbGP7pl-KHo>

DOWNLOADLINK -> <http://ren.game-maps.net/index.php?action=file&id=1283>

NEW : the same interior for the NOD refinery, but with some changes.

Download the files in my attachment below screenshot. I have animated a damage stage as you can see.

Note : You must have the GDI Refinery (texture) files in your data, otherwise it is missing textures

File Attachments

Doors you can see through are too much of an advantage to be considered as a simple "advantage" skin, this is a cheat because you can see anything on the other side of them(for example: mines, nukes/ions, other people), I do agree this is a cheat and this should be blocked, anyone who thinks this is not a cheat can't be thinking being able to see stealthed units is a cheat, which it is.

PS. If you don't see this as a cheat then, A) you are a cheater or B) you need to get your head checked.

PS. If you don't see this as a cheat then, A) you are a cheater or B) you need to get your head checked.

i agree its no diffrenet then wall hacks but well....door hacks?

anyways any mod,skin anyhting that helps you have even a little advantage is an advantage mod or skin,,,,if its to extreme then it can and most likely a hack but not the kind people expect even tho it looks cool I hope TT patch can block them

PS. If you don't see this as a cheat then, A) you are a cheater or B) you need to get your head checked.

@beacons: There are things called "sounds"; you can hear the beacon and thus know it's there...

@mines: If the person who mined the door-ways mined them correctly, then you wouldn't be able to see them even if you had doors with windows in them.

The only argument you can really argue is being able to see inside to know when someone is coming out. But, iirc, you can have your sound tuned just right to where you can here foot steps....So, that's not even an argument I can see...

nod ref in general doesn't work

OR

the skin/mod (w/e) is for all maps

whatever you mean't by that question ^^^^

I also noticed in the GDI ref you can jump in to where sakura is, not something you can normally do, so... DON'T DO IT ON SERVERS

You can jump into it in lan mode, but in internet you can't because you are not the host.

Had a couple of PM's from people that wanted the character i used while taking the screenshots.

Its the engineer from old Reborn which i converted to the engineer in Renegade.

Enjoy

Havoc falling out of the bed is hilarious

EDIT: On LAN don't jump in where Havoc is, you'll fall through the floor

Would you want to "chill out" in a tiberium pit?

BTW: nice avatar Di3, just noticed it, lol.

Would you want to "chill out" in a tiberium pit?

If that's the case, then GDI has a really shitty employment policy. They ought to unionize.

Ok there is another problem nod ref, there is inside wall and walk through the wall and fall down each wall (PT wall are fine).

Gdi ref ae fine (I havent tested the wall last time reported the floor problem) ;-\$

Ok, i'll make it so that you won't be able to walk through the window into the room where the bed stands.

That fixes all right?

Di3 you don't have to fix such a miniscule detail

Havoc on bed is part of the building's health. The less health building has, more wrecked the bed is. I think it's a nice touch

SSnipe wrote on Wed, 24 December 2008 19:29Die can I have permission to edit it just for me to remove the smoke since the smoke or w.e fucks up my fps

smoke commonly laggs up my game 2 , but if you've read previus release threads by di3, you'd relize that you can edit his work, just as long as you don't post it here for download, only SS. I probly shouldn't be saying this scence i'm not Di3, but from my point of view you can. Like the Barracks Bar, I posted SS of alot of neat changes i made to it, and the errors i found in the originals). If you don't like what I posted, then don't replie to it, I'm h8ing ur posts towards mine (not u specifically, but every one genericly). If you are going to post it, then i suggest you re-phrase the question, b/c it just seams as if your whanting to edit it for your self.

=samous

No arngy replies back on this plz

of course you can edit whatever you want

If you want the mist totally removed simlpy remove ref_mist2.w3d out of your data

sorry to bumb this topic but i found bugs..

i don't know if it's because i added the gdi ref than overwritten some of the files with the nod ref but i have a video uploading and it should be done anytime, i will post back here with it..

if it is i will need to know all the files for the ref because i have a lot of skins i have almost skined my hole ren

OMG Roni wants it removed?

Delete the W3D files starting with MGRES_ to delete the gdi refinery.

Delete the W3D files starting with MNRES_ to delete the nod refinery.
