A lot of servers these days have Recommendations disabled because people always abuse it,
that is the command !rec, some still have the system there but you can only be recommended by
the server.

Using or not using RenGuard has nothing to do with recommendations.

Do other people on the server you play on get recommendations?

You shouldn't care too much about recommendations anyway.

Perhaps the server your playing on has turned them off, try a different server.

It's enabled, for people with RR or custom scripts 2.9 or higher.
