I request a map to be made that all it is a simple NOD airstrip from MP, and big expanse. I intend to use this just to test out my C-130 mods, so all it has to be is an airstrip and a big playing field (also some PT, min of 1). Could anyone make this for me? it should be relitively simple, i'm just bad at making maps.

I'll try to do it right now but if it doesn't show up for a day or two please be patient.

BUMPand DUBBLE post, sry, UBER SUPER SRY!

the map is good, verry nice loking 2, but... i need the scripts that make a veh autodrive off the airstrip already on the map, or it won't work. The map is suposed to be JUST like a normal map, but without all the bases, buildings, ect. Thanks.

'Altzan Help Me"

Ahh it seems I forgot that part. No Worries.

Here be the fixed version.

Perhaps you could share some of your C130 drops in return?

if you want, i can release m entire collection of C-130 drop files, but i'm to busy to make a complete working set. It's been a long time scence i have actually made an actual drop, but i'm going to be working on it again. When i'm finished, i will release a EXE file with ALL the drops i made + more. (I also made a notes file with ALL the comands, scripts, presets, ect. in it, so if you want that, it can be usefull for making drops, if thats why your asking for my release).
