Probably more than you could actually process in your head.

Lots. Prob about 120 if you mean the ATI Radeon X4670. If you mean an older card, closer to 15.

Probably.

Edit : Ok, a proper response:

Renegade's performance is influenced more by the CPU than the graphics card and it would help if you posted what your CPU specification is.

depends which card your geting

This is a 512mb Radeon HD 4670 and you would probably get close to 200 fps most like in 140 - 180 range with good anti aliasing settings

Model

Brand SAPHIRE

Model 100255L

Interface

Interface PCI Express 2.0 x16

Chipset

Chipset Manufacturer ATI

GPU Radeon HD 4670

Stream Processors 320 Stream Processing Units

Memory

Memory Size 512MB

Memory Interface 128-bit

Memory Type GDDR3

3D API

DirectX DirectX 10.1

OpenGL OpenGL 2.0

Ports

HDMI 1 via Adapter

DVI 2

TV-Out HDTV / S-Video Out

General

RAMDAC 400 MHz

Max Resolution 2560 x 1600

CrossFire Supported Yes

Cooler With Fan

Dual-Link DVI Supported Yes

Windows Vista Certified for Windows Vista

HDCP Ready Yes
