Hi,I reinstalled Renegade and when I try to download the updated version of Westwood shared internet components or whatever it is that you need to download before you play online after a fresh reinstall, it says "Download File Not Found"

Is there anywhere that I can download this updated version and just put it in my westwood folder?

Patch 1.037? That's here somewhere

If your internet components have gone pear shaped, then download and install the Reborn or APB clients, or the Ren FDS.
