I installed renegade on my new computer but the problem is my HUD is not working correctly, i see the text but i do not see the picture of health, gps, ammo, or health bar on buildings.

I have reinstalled my renegade several of times, did not work. . .

Can any one help me out?

Are you talking about this hud: <http://ren.game-maps.net/index.php?action=file&id=965> make sure you have Scripts 3.4.4 installed.

It is also possible the hud does not support the resolution you're using, try playing around with the resolution(I would suggest setting it to 1024x768 first).

Try this: Press F8, type 'hud 1', press enter.
