I'm on the hunt for as many Renegade maps as i can find. I have all the standard sites but would like to know if anyone knows of anymore? Some not so easy to find sites. I've googled myself to death   I currently have close to 400 maps but i know there are more out there.

www.thekoss2.org/maps but I suppose you'll already have most, if not all of these. They're a combination of the uber mappack and maps we came across and liked for our I-CW.
